

DOC IN THE FIELD

A case based discussion

INTRODUCTION

The launch of the Highland Park EMS System's Physician Response Vehicle (PRV) Program has been a 95/5'er... 95% great, 5%... eh, maybe some things to iron out. Not a bad percentage considering the size and scope of this operation! We greatly appreciate our supporters, and for those with an understandable dose or skepticism, please do not be shy. Share your thoughts, your concerns, your experience. We are open to all feedback.

A singular goal: **to support our field providers in delivering exceptional patient care**, will be the lifetime PRV motto. We welcome efforts to further that aim.

Moving forward, the HP EMS Team will periodically select a case or topic for discussion. Along with our providers we want to stimulate conversation, investigation, curiosity, and, of course, knowledge. **IMPORTANTLY**, we need your feedback! Please share with your medical officer or EMS coordinator any interesting, confusing, or rewarding encounter or concept. It can be as specific as, "what in the world was that heart rhythm?!" to "the entire concept of aortic dissection" (don't worry, we can break it down into usable nuggets). No offer too small, no suggestion too large.

Stay tuned for the upcoming First Case!

Professionally,

 Feinzimer

Dr. Ben Feinzimer
EMS Medical Director - Highland Park
